

CX.250 HP

PNEUMATIC BRAKE WITH HP COVER

- ✓ Modular brake
- ✓ Long life span
- ✓ Constant and precise torque control
- ✓ Minimum maintenance
- ✓ High heat dissipation
- ✓ Compact size
- ✓ Respect for the environment and operator's health
- ✓ Equipped with High Performance fan

Since more than 40 years the Combiflex pneumatic brake has been representing the reference brake for the converting industry, today it's the best seller brake in the world.

All our Combiflex brakes are equipped with asbestos free pads to guarantee respect for the working environment and the operator's health; moreover, they are equipped with a single fan and a turbine disc that convey the air flow in the crucial zone of the brake increasing the life span, the heat dissipation and reducing the maintenance.

Combiflex is a modular brake, it means that we can provide it with a number of calipers required by the application; moreover, the distributors of each caliper can always be accessed in order to select the most suitable number of calipers for the regulation.

Combiflex brake guarantees long life span of the pads, constant and precise torque control, high heat dissipation and compact size.

The HP fan allows to reach an higher heat dissipation in order to increase the life span of the pads reducing maintenance costs. Moreover, the cover drastically reduces the external dimensions of the brakes.

The new HP3 cover can be equipped with a sensor that recognize the internal temperature in order to always maintain automatically the right speed of the fan. Three leds on the cover indicates the fan speed.
