The new brake Exploit XE10 is the best compromise between the Combiflex, the well known and most used in the world, and the Extreme XT10, the new pneumatic brake with unmatched performance.

Exploit is fully patented and is the cost effective solution which guarantees high performance, a very easy maintenance and respect for the environment at a low price to face an increasingly demanding market.

The brake is made up of a canalized flow disc, specifically designed to have a constant cooling of the crucial zones of the brake, four aluminium calipers, through which is it possible to smoothly control the wear of pads, whose composition is an high performance and asbestos free mixture.
